

## LIVESTOCK CHUTES

### Hydraulic Chutes

- Pressure gauge on all units reduces possibility of injury to animals.
- Super quiet hydraulic system greatly reduces possibility of “noise panic”.
- All control arms and center squeeze bars have sealed pillow-block bearings.
- All chutes feature emergency side exit as standard equipment.
- All bearings come equipped with grease zirks for easy maintenance.
- Fold-down bars are saddle cut for extra strength and feature spring-loaded latches.

## Calf Table

**W-W Calf Table** is designed to work calves up to 600 pounds, Table features a headcatch and side squeeze bar for positive holding of animal. The Table is designed with exceptional balance, resulting in easy tilting. A ratchet-driven dally rope on the rear gate draws the animal's legs back for easy access, resulting in time-saving, efficient working of any calves.

#### W-W Calf Table Specifications
